

WAHID ALI

Full Stack MERN Developer | React.js · Node.js · Express.js · MongoDB

Islamabad, Pakistan | +92 325 5413623 | devwahid4@gmail.com

Portfolio: <https://wahid-s-portfolio.vercel.app/> | GitHub: <https://github.com/devwahid-hash> | LinkedIn: <https://www.linkedin.com/in/wahid-ali-4b5bb830b/>

PROFESSIONAL SUMMARY

Full Stack MERN Developer with 1year of hands-on experience building production-style web applications using React, Node.js, Express, and MongoDB. Built an escrow-based P2P marketplace with real-time chat, background job processing, and AI-assisted features, and shipped authentication systems, REST APIs, and responsive UIs in a professional team setting. Comfortable owning a feature end-to-end — from database schema to deployment — and quick to pick up new tools such as Docker, Redis, and cloud APIs.

TECHNICAL SKILLS

Languages & Frameworks: JavaScript (ES6+), React.js, Node.js, Express.js, HTML5

Databases: MongoDB, MySQL, Redis, Firebase

Auth & Security: JWT, OAuth (Google & GitHub), RBAC, bcrypt.js, Passport.js, Firebase Auth

APIs & Real-Time: REST APIs, Socket.io, Webhooks

Cloud & DevOps: AWS, Docker, CI/CD, Vercel, Netlify

State Management & UI: Redux Toolkit, Tailwind CSS, Framer Motion

Tools: Git, GitHub, Postman

PROFESSIONAL EXPERIENCE

MERN Stack Developer — UzrTech

June 2025 – Nov 2025 (6 Months)

- Built and maintained full-stack features across the MERN stack, shipping responsive React UIs and RESTful Express/Node.js APIs for production use.
- Implemented JWT-based authentication with role-based access control (RBAC) and bcrypt password hashing to secure user accounts and protected routes.
- Developed real-time features (live updates, notifications) with Socket.io and automated transactional emails using Nodemailer.
- Managed application state with Redux, refined UI interactions with Framer Motion, and collaborated in an Agile/Scrum workflow using Git/GitHub with sprint planning, code reviews, and CI/CD pipelines.

KEY PROJECTS

Bazarex (TrustTrade) — Escrow-Based P2P Marketplace

github.com/devwahid-hash/Bazarex

- Built a full-stack MERN marketplace with escrow-based payments, auto-released via a Redis/Bull background job or on delivery confirmation.
- Implemented JWT access/refresh authentication with Google & GitHub OAuth (Passport.js) and role-gated routes for Buyer, Seller, and Admin.
- Integrated Google Gemini AI to auto-generate product descriptions and score disputes for fraud risk; used Socket.io for real-time buyer–seller chat.
- Added Cloudinary image uploads, an admin dashboard for dispute resolution, and a seller wallet system tracking balances and platform fees.

LearnVora LMS — Learning Management System

github.com/devwahid-hash/LearnVora

- Built a full-stack MERN LMS with JWT authentication, Firebase Google Sign-In, role-based access control, and protected REST APIs for students and administrators.
- Implemented Firebase Authentication, Nodemailer OTP/email verification, and bcrypt password hashing for secure account management.
- Developed course management functionality with Cloudinary and Multer media uploads, and integrated Google Gemini AI for AI-assisted learning features.
- Built a responsive frontend with React, Redux Toolkit, Tailwind CSS, Framer Motion, Axios, and React Router, optimized across desktop and mobile.

AI Image Enhancer — AI-Powered Image Quality Tool

github.com/devwahid-hash/image-enhancer

- Built an AI-powered MERN application integrating the PicWish API for high-quality image upscaling and background removal.
- Developed secure Node.js, Express.js, and MongoDB backend APIs to handle image processing requests and task management.
- Built a responsive React, Tailwind CSS, and Axios frontend with asynchronous polling to track enhancement status and deliver processed images.

EDUCATION

Bachelor of Science in Computer Science (BSCS)

Preston University
